

# BOX SCRAPER RIPPER

The Blue Diamond® Skid Steer Box Scraper Ripper is the perfect Skid Steer attachment for reconditioning gravel roads and driveways. The rippers will resurface the gravel that has been buried in the ground over time, while the cutting edges will smooth out and level the gravel.

This saves you from having to refill driveways with gravel everytime it starts to settle. The Box Scraper can be driven forward or backwards by simply removing the ripper tines and rotating them. Models are available in 4 working widths from 60", 72", 84" and 96". It comes powder coated to give the attachment the best protection.

## FEATURES INCLUDE

- Replaceable and reversible cutting edges
- Replaceable ripper shanks
- Adjustable ripper tines
- Powder coated
- American made
